BEYOND FEAR – TOWARDS HOPE

AN EXHIBITION OF THE IRAQ WAR

The Eyes Wide Open exhibition is a multimedia, multisensory journey through the words, images, and sounds of the Iraq war. Visitors move through a vivid memorial to the war's soldier and civilian victims, a searing exposure of the statements told to the U.S. public to justify the war, a compelling outline of what the war is costing us at home, and finally to an interactive, easy way to contribute their voices to changing our country's course toward peace.
